According to the November 2011 Crop Production Report released by NASS, the states production fell 989,000 cwt or 19 percent from the previous season. Spring planting delays, coupled with a dry summer and a wet harvest decreased yields sharply to 255 cwt acre. Early chip yields suffered the worst, with many growers unable to fulfill contract volumes.

MAINE---Shipments to Chippers 46-41-44---Movement expected about the same. Most movement on pre-season contract. Too few open market sales to establish a market. According to the November 2011 Crop Production report released by NASS, production across the state of 14 million cwt decreased nearly 12 percent from the previous year, with 3,000 acres abandoned. This production figure is the lowest in state history dating back to 1920. Yields were forecasted at 260 cwt per acre, down from 290 the previous year. Many growers believe storage losses will continue to severely shrink holdings in the next few months.

PENNSYLVANIA---Shipments to Chippers 16-13-13---Movement expected about the same. Most movement on pre-season contract. Too few open market sales to establish a market. According to the November 2011 Crop Production report issued by NASS, the states production (1.9 million cwt) dropped 11 percent from the previous year due to weather issues during the planting and growing season, as well as the flooding that occurred during September along the Susquehanna River. Yields of 230 cwt per acre are expected, compared to the 2010 seasons final of 245 cwt per acre.

OHIO---Shipments to Chippers---Shipments 2-1-3---Movement expected to increase slightly. Movement on pre-season contracts. Too few open market sales to establish a market. Production of .4 million cwt is expected, down 30 percent from the previous year, with yields of 250 cwt per acre estimated.
