Market Commentary

Commentary: The South Americian crop, which has been a major focus this year, remains in focus. Both Brazil and Argentina, particularyly Argentina, have reduced their soybean crop sizes again. All agricultural agencies agree that there will be another reduction in crop size. There were also rumors that Brazil was going to halt soybean shipments for the remainder of the year. Brazil has confirmed that this is only a rumor, but the rumor did its damage, and the entire soybean complex, that was trending downward for the week, jumped up to end the week in positive territory. Corn futures tried to move with the direction of the soybean comlex, but was unable to do so. In fact, speculators sold and estimated 14,000 contracts to end the week, forcing corn futures lower. With the options for May expiring, and the corn futures sell-off, the market is likely to jump early next week for corn. Wheat was unable to make gains last week. It never even tried to stay in step with corn and the soybean complex. Currently, there is no good reason for wheat to make any signifgant increases, though that can change rapidly.

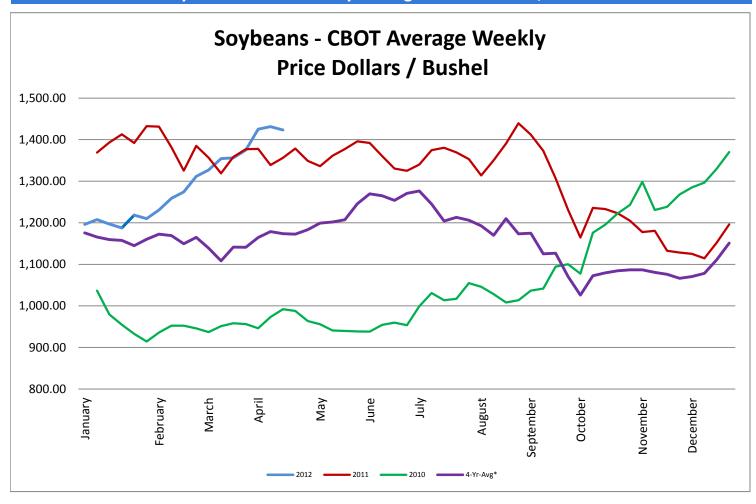

Corn futures closed between 6.01-3/4 and 6.23-1/4 per bushel, ending the week at 6.12-1/2. Soybean futures closed between 14.07-3/4 and 14.46-3/4 per bushel ending the week at 14.46-3/4. Soybean meal futures closed between 9.05-30 and 9.06-30 per short ton ending the week at 9.05-30. Soybean oil futures closed between 9.05-31 and 9.05-38 per pound, ending the week at 9.05-38. Wheat futures closed between 6.10-3/4 and 6.24-3/4 per busehl, ending the week at 9.05-3/4.
