The 15th Annual Report to Congress on the Status of Stocks for 2011: A record number of rebuilt fisheries

Dear Stuart ,

Today, NOAA's Fisheries Service released the 15th annual report to Congress on the nation's Status of Stocks. More than any a previous year, the Status of Stocks report for 2011 underscores the strength of the science-based management process and demonstrates we are actively turning the corner on ending overfishing and rebuilding our nation's fisheries. A record number of stocks were declared rebuilt in 2011, with a decrease in both categories of overfishing and overfished determinations. To read more, go to [Status of Stocks 2011](#), where you can download a pdf of the report and related informational materials and links.

If you have any questions, please feel free to get in touch with me.

Warm Regards,

Laurel Bryant
