

Weekly Market Updates

Volume No. 17 Issue No. 50 Date: December 13, 2012

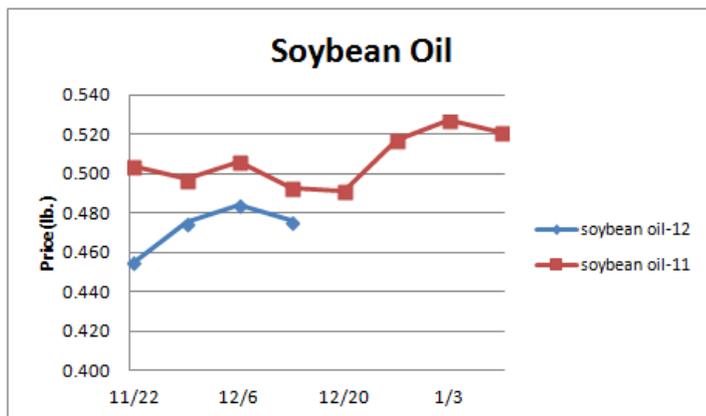

Beef- Beef output last week increased .9% and was 1.3% larger than the same week in '11. Beef production is being curbed this week which is supporting beef prices. In Oct, U.S. beef exports were down 3.4% but were 14% larger than the previous month. Russia may restrict U.S. beef imports due in part to an ongoing trade dispute. In '11, beef exports to Russia were 5% of total U.S. beef exports but only .4% of the U.S. beef output. This shouldn't have a major impact on overall beef prices but could be slightly negative for typical beef trade items with Russia including fat trim, inside rounds and knuckles. Price USDA, FOB per pound.

Dairy- The CME butter market is steady. Butter exports in Oct were up 48% and the highest since May. International butter prices have risen recently which is supportive of U.S. butter exports. The butter market may make an early bottom this year. The CME cheese markets are soft. Oct cheese exports were 13% above '11 and a new record for the month. Since Oct, the export environment for U.S. cheese has become more favorable. The CME cheese market typically falls 8.7% over last two weeks of the year. Any further declines this year should be less intense. Prices per pound, except Class I Cream (hundred weight), from USDA.

Weekly Market Updates

Pork- Pork production last week declined 1.3% and was .2% larger than the same week last year. Pork exports during Oct were up 3.4% versus a year ago and were the second highest since Nov '11. Russia may be curbing pork imports from the U.S. Domestic pork trade with Russia last year was 4% of total U.S. pork exports but only .6% of U.S. pork output. Restricted pork trade with Russia could slightly improve supplies of usual pork export items including hams, trim, loins and butts. The ham markets are seasonally declining. Prices USDA, FOB per pound.

Poultry- U.S. chicken exports in Oct were 6% less than the prior year but the largest in twelve months due in part to a relatively deflated U.S. dollar. If a weaker U.S. dollar persists into next year, it could support chicken leg quarter prices. The USDA is forecasting 1st quarter '13 chicken production to be 1% less than '12. Broiler egg set data as of late has not established a clear trend which conflicts with the USDA's output projection for this winter. The chicken wing markets typically remain sideways during the next two weeks but then rise 10% in Jan. The boneless skinless chicken breast markets usually appreciate next month as well but any increases this year may be tempered. The liquid egg markets may have peaked. Prices USDA, FOB per pound except when noted.

Seafood- Most shrimp markets remain below year ago levels. In Oct, U.S. total shrimp imports and shell-on shrimp imports were down 20% and 16% respectively versus last year. Year-to-date U.S. shrimp imports through Oct were down roughly 8% compared to '11. If the U.S. dollar continues to trade at relatively weak levels, it could cause fairly lackluster shrimp imports to persist, bringing support to the shrimp markets in Q1. Produce- Iceberg lettuce prices have fallen sharply recently due to strong Southwest lettuce production. Yuma and Imperial Valley lettuce shipments last week were 22% above a year ago. The downside risk for the iceberg lettuce markets from here may now only be modest. Tomato shipments from FL last week were 37% below '11. Cool overnight temperatures in FL have slowed tomato growth. Still, mature green tomato supplies are expected to pick up from FL and Mexico during this month which could place downward pressure on the various tomato markets. Prices USDA FOB shipping point unless noted (terminal).
