

Key Commodity Report Weekly

March 2, 2015

Market Commentary

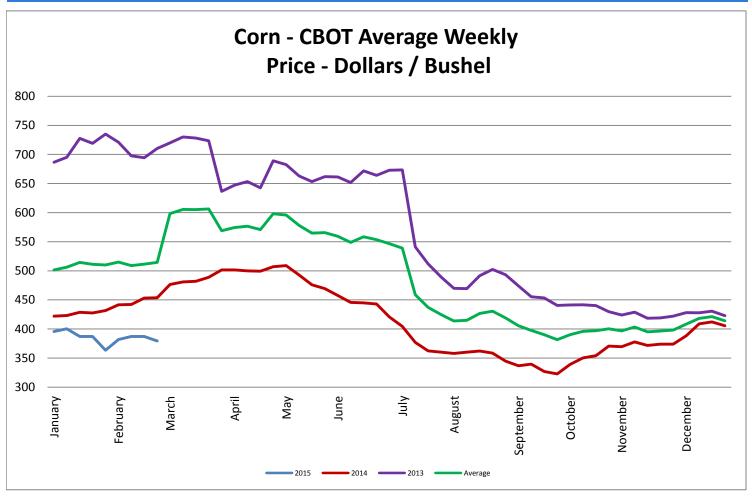

Commentary: Last week soybean oil trading was down vs. the previous week, but was making a run higher by the end of the week, in fact reaching its high on Friday. And, while the futures market will still show March as a nearby, the actual trading has moved to May futures. The reason for the firming soybean oil futures, for that matter, the firming soybean complex as a whole, is likely due to the uncertainty of the South American truck driver strikes. This happens every year and will likely be quickly resolved as the SA harvest continues. Their harvest is 50% complete in some areas and 25% in others. With the SA harvest likely to be another record, the firm prices will come down if they can keep their trucks rolling and the docks loading.

In Canola crushers are experiencing difficulties in getting rapeseed to crush. They are also still experiencing railcar shortages keeping prices firm. Margins for the Canola producers is good.

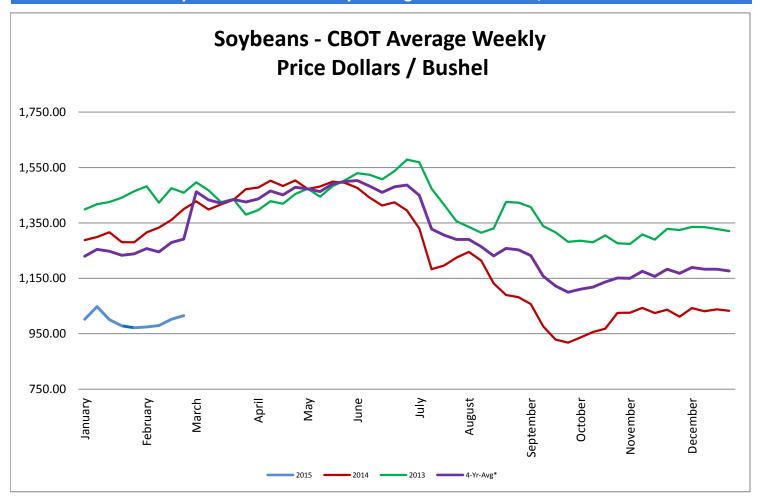

Commodity Information: Commodity information found in this sheet is publically available. It can be found from numerous sources, all of which are noted. This report is for informational purposes only. Please do not make hedging or buying decisions based on this report. Please note that rounding can affect the percent of change values.* Paul's Currency Index compares the U.S. Dollar to five other currencies, Euro, British Pound, Swiss Frank, Canadian Dollar, and Chinese Juan.
