#### **Beef, Veal and Lamb Report**

Beef, Veal & Lamb -Beef production last week improved from the Christmas shortened prior week but was 2% less than the same week in 2014. Beef production is expected to return to more normal levels in the near term but poor beef packer margins, driven by rising cattle prices, may temper production. Recent adverse weather is causing various challenges in feedlots influencing the cattle markets upward. Beef demand typically shifts to more end cut beef products this month which can bring a lift to the appropriate markets. The five year average move for the choice 116 chuck market during the next three weeks is an increase of 8%. Lean beef trim prices usually firm this month as well. Price

The 2016-17 domestic winter wheat crop entered dormancy with its second best rating in the last five years. Further, the crop is benefiting from recent precipitation and snowfall. Unless the weather turns negative for the wheat crops here or abroad, it may be hard for wheat prices to rally in the coming months. Prices USDA, FOB

## **Dairy**

The cheese markets continue to trade at relatively engaging levels for buyers. Unseasonably warm temperatures this fall have boosted milk production in the Midwest. Consequently, milk continues to trade below government set price levels which should only encourage cheese production. History suggests that the downside price risk in the cheese markets from here may be nominal. But it may be hard for cheese prices to rally substantially in 2016 unless the international dairy and domestic nonfat dry milk markets appreciate. The CME butter markets remain supported. Prices per pound, except Class I Cream (hundred weight), from USDA.

### Pork

Pork output last week rose sharply from the holiday shortened prior week but was just .9% better than the same week last year. The USDA is currently forecasting first quarter 2016 pork production to decline .2% from last year. It's more likely that pork output will be up modestly versus 2015 but smaller expansion than what was experienced for the last several months could bring support to the pork markets. Pork exports could expand during the next few quarters as well as international buyers take advantage of the depressed U.S. prices. Prices USDA, FOB per pound.

# **Poultry**

Chicken production for the week ending December 26<sup>th</sup> was 5% less than the same week last year. Chicken output expansion compared to 2015 is expected to be only modest during the next several weeks as chicken producers continue to grapple with decade plus lows in chicken breast and leg quarter prices. The chicken wing markets have started to firm with the NFL playoffs commencing this weekend. Last week, the ARA Chicken Wing Index rose \$.05 marking the biggest rise for the week since 2011. Further, the wing markets are pricing at expensive premiums to the boneless skinless breast markets. The last time this occurred, the ARA Chicken Wing Index declined 39% from the Super Bowl into the first week of May. Prices USDA, FOB per pound except when noted

### **Seafood**

The Alaskan Bearing Sea snow crab fishing season limped into the holidays with just 2% of the 2015-16 quota landed but fishing typically expands sharply during January. Still, this season's quota is 40% smaller than the prior year and the least since 2006-07. Thus, Alaskan snow crab dock prices could be expensive this winter bringing support to the markets. Cocoa prices have softened during the last week as the historically inflated markets are encouraging output expansion in West Africa. The greater long term risk in cocoa prices from here is to the downside. Price bases noted below.

#### **Produce**

Iceberg lettuce prices remain fairly inflated as adverse weather and holiday shortened harvests have supported prices. Precipitation and cold temperatures this week could shorten the lettuce harvest again in the Yuma-Imperial Valley region. Thus, the lettuce markets could remain volatile in the near term and may not fully recover until later this month. This same challenging weather could influence the western tomato harvest this week as well. The tomato markets could remain expensive during the next few weeks. Still, history suggests that in the longer term the greater risk in these markets is to the downside. Price bases noted below.
