Beef, Veal and Lamb Report

Beef, Veal & Lamb Beef output last week declined .2 but was .4% better than the same week last year. The January 1 cattle on feed inventory was .5% smaller than last year, however, the near slaughter ready cattle supply is bigger. Cattle placements into feedlots during December were down .8 from 2014. The average placement weight was 1.7% heavier. Solid beef production gains versus 2015 are anticipated this winter. Many of the beef markets have softened during the last week due in part to a downturn in shipments. However, retailers may be planning further feature activity which could bring support to the markets soon. Choice boxed beef forward beef shipments last week were the biggest since July. Price USDA, FOB per pound

Description	Market Trend	Supplies	Price vs. Last Year
Live Cattle (Steer)	Decreasing	Short	Lower
Feeder Cattle Index (CME)	Decreasing	Short	Lower
Ground Beef 81/19	Increasing	Good	Lower

Grains

The relaxation of export tariffs in one the world's largest corn, wheat and soybean product exporting countries, Argentina, is tempering demand for U.S. product. Bigger Argentine harvests in the coming years may continue to moderate U.S. grain and oilseed exports. The grain markets may remain range-bound this winter.

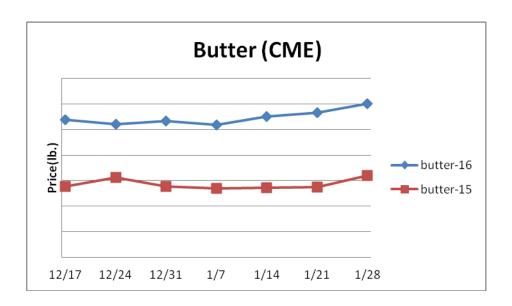

Description	Market Trend	Supplies	Price vs. Last Year
Soybeans, bushel	Decreasing	Good	Lower
Crude Soybean Oil, lb	Increasing	Good	Lower
Soybean Meal, ton	Decreasing	Good	Lower
Corn, bushel	Increasing	Good	Lower

Durum Wheat, bushel	Decreasing	Short	Lower
Pinto Beans, lb	Increasing	Good	Lower
Black Beans, lb	Steady	Good	Lower
Rice, Long Grain, lb	Steady	Good	Lower

Dairy

U.S. milk output remains lackluster. During December, the U.S. produced just .7% more milk than the previous year due to a .3% larger milk cow herd and a .4% gain in milk per cow yields. Milk farmers added a net 1,000 head to the herd during the month. December marked the fifth consecutive month where milk production growth was less than 1% year over year. This is due in a large part to poor margins for milk farmers in the biggest producing state California. Milk output there during December was down 3% from 2014. Elevated butter prices could persevere this winter. Prices per pound, except Class I Cream (hundred weight), from USDA.

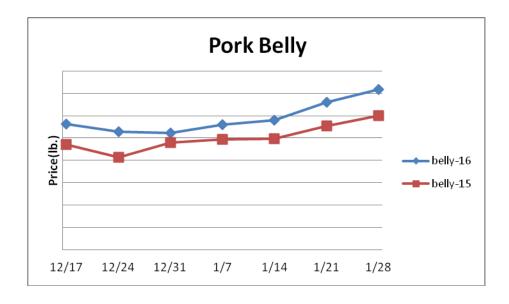

Description	Market Trend	Supplies	Price vs. Last Year
Cheese Barrels (CME)	Decreasing	Good	Lower
Cheese Blocks (CME)	Decreasing	Good	Lower

Class 1 Base	Decreasing	Good	Lower
Class II Cream, heavy	Decreasing	Good	Higher
Class III Milk (CME)	Increasing	Good	Lower
Class IV Milk (CME)	Decreasing	Good	Higher

Pork

Pork production last week rose 1.7% but was .2% less than the same week last year. Hog supplies are starting to seasonally tighten which should cause pork output to decline in the coming months and bring modest support to the pork markets. December 31st pork stocks were 8% more than the prior year with ham (2%), belly (13%), rib (55%) holdings all above 2014. However, pork belly disappearance during the month was 4% better than the prior year and a record for any month. Further pork belly price appreciation may be forthcoming. Prices USDA, FOB per pound.

Description	Market Trend	Supplies	Price vs. Last Year
Live Hogs	Increasing	Ample	Lower
Sow	Increasing	Ample	Lower
Belly (bacon)	Increasing	Good	Higher

Picnic, untrmd	Increasing	Good	Lower
SS Picnic, smoker trm box	Increasing	Good	Lower
42% Trimmings	Decreasing	Good	Lower
72% Trimmings	Increasing	Good	Lower

Poultry

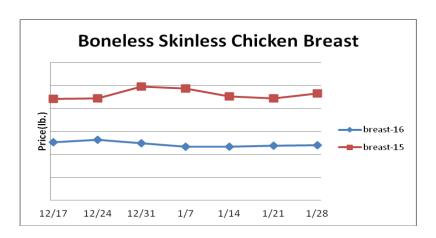

Chicken production for the week ending January 9th was .1% less than last year. Turkey output for the same week was up 1% compared to 2015. Seasonally rising demand is lifting the chicken wing markets and history suggests additional price increases are likely in the coming weeks. The USDA recently discovered multiple cases of avian flu in turkeys in Indiana. It is a different strain that decimated the turkey and table egg industry last spring and is believed to have a much smaller impact on the industries. However, it is important to monitory as Indiana typically accounts for 9% of table egg and 11% of turkey domestic production. The egg and turkey markets are expected to consistently fall below 2015 levels later this year. Prices USDA, FOB per pound except when noted.

Description	Market Trend	Supplies	Price vs. Last Year
Whole Birds (2.5-3 GA)	Increasing	Good	Lower
Wings (whole)	Increasing	Good	Lower
Wings (jumbo cut)	Decreasing	Good	Lower

Seafood

The Alaskan Bering Sea snow crab fishing season is starting to gain momentum with 7.3 million pounds landed as of January 26th. This represents 20% of the quota. As a reminder, the 2015-16 Alaskan Bering Sea snow crab quota is historically small and a whopping 40% below the prior season. The downside risk in snow crab leg prices may be nominal. Prices for fresh product, unless noted, per pound from Fisheries Market News.

Description	Market Trend	Supplies	Price vs. Last Year
Shrimp (16/20 frz)	Decreasing	Good	Lower

Orange Juice lb ICE	Increasing	Good	Lower
Honey (clover) lb	Steady	Good	Lower

Produce

The tomato markets remain inflated due in part to challenging weather both in Florida and Mexico. U.S. tomato shipments last week declined 12.9% from the prior week and were 17.8% less than the same week last year. Season to date tomato shipments are tracking 5.1% below the previous period. The tomato markets could remain erratic during the next few weeks. Lettuce prices have declined as the weather has improved in the Yuma-Imperial Valley region. The downside price risk in the iceberg lettuce markets from here, however, may only be modest. Avocado prices usually trend higher during the mid to late winter.
